MONTHLY PROGRESS REPORT

Date:15/12/2025

1. INTERN DETAILS

Intern's Full Name:	Tshwarelo NDLOVU
Programme	University placement
Employer's Name	Ndiwanga Business Consulting
Reporting Period	Month

2. EMPLOYER & HOST COMPANY DETAILS

Employer's Name	Ndiwanga Business Consulting
Host Company Name	Vhutambo
Department/Division	*IT*
Mentor Contact Details	*0716466011*
Mentor Contact number	MR TSIENI MBULUNGENI

3. SUMMARY OF THE MONTH'S ACTIVITIES

Overall focus/key themes for the month:
Development and improvement of the Website Management System, with emphasis on backend automation, structured URL routing, Docker-based environment setup, and dynamic validation on the frontend.

4. DETAILED ACTIVITIES AND PROJECTS

List the main tasks, projects, or responsibilities undertaken during this reporting month.

Date Range/ Week	Task Description	Your Role & Responsibilities	Skills Applied/Developed	Progress/Status	Challenges & Solutions
Week 1 (17-21 NOV)	*Backend Logic & Data Structure*	*Developed admissions.json schema and parent submission logic.*	*PHP, Design Small System*	completed initial admission flow.	*Faced environment configuration issues, which were resolved by adjusting Docker settings and testing.*
Week 2 (Nov 24-28)	*Dashboard Automation*	*Built the Headmaster Dashboard to allow real-time Configured Dockerfile for PHP 8.2 Apache and resolved Git merge conflicts.*	*PHP, RBAC (Role Access Control)*	*[e.g., All drafted]*	*Identified that the code was using physical file paths (e.g., /app/headmaster.php) instead of clean URLs configured in the router. Updated all header('Location: ...')*

					calls to use root relative paths like /headmaster
Week 3 (Dec 01-05)	Environment & DevOps	*Configured Dockerfile for PHP 8.2-Apache and resolved Git merge conflicts.*	*Docker, Apache, Git*	*Build environment stabilized.*	*The Docker build failed to pull the base image due to DNS resolution errors.*
Week 4 (Dec 08 12)	*Frontend Validation & UI*	*Implemented JS for age/grade calculation and fixed 404 routing issues.*	*JavaScript, DOM, URL Routing*	*UI/UX significantly improved.*	*Manually configured the Docker daemon settings to use Google DNS (8.8.8.8) and performed a full*

5. LEARNING AND DEVELOPMENT

New Skills Acquired/Enhanced:

- Docker & Backend Development**:** Gained experience in Docker containerization for PHP environments, clean URL routing, and managing backend logic using PHP sessions and JSON data storage.
- Frontend Automation**:** Improved JavaScript skills for DOM manipulation, real-time form validation, and automatic calculations.
- Professional Growth**:** Strengthened full-stack and DevOps-related skills, improving ability to manage both application code and its server environment.

Knowledge Gained:

- System & Networking Understanding**:** Gained insight into school admission business logic (age rules and parent notifications) and learned how Docker networking interacts with host DNS.

Training/Workshops Attended (internal or external):

- Internal Peer Review: Participated in informal technical walkthroughs focused on Git workflows and resolving merge conflicts in collaborative environments.
- Online Documentation Study: Reviewed official PHP and Docker documentation to resolve environment-specific build issues.

Feedback Received (from supervisor/colleagues):

- Positive**:** Praised for taking initiative in resolving "404 Not Found" routing errors and successfully implementing the "Notification Bell" feature for parents.

- Constructive**:** Advised to improve data validation to prevent "N/A" entries on the dashboard, which was addressed by implementing a robust `getAdmissionData` helper function.

6. SELF-ASSESSMENT AND REFLECTION

- **Strengths demonstrated this month:**

- Demonstrated strong problem-solving skills, technical versatility across backend, frontend, and Docker configuration, and attention to detail in improving user experience.

Areas for improvement:

- Identified the need to improve code documentation and strengthen SQL/database management skills in preparation for future system scaling.

Personal Reflections:

- Gained a deeper understanding of the importance of DevOps, recognizing that server configuration and application development are equally critical, and found the work meaningful due to its impact on school management.

7. GOALS FOR THE NEXT MONTH

Key Objectives/Projects:

- Migrate admissions data to MySQL, implement an automated email system for parent notifications, and develop a secure document upload module for birth certificates.

Skills/Knowledge to Focus On:

- SQL and database normalization, and basic cybersecurity practices for input sanitization.

- Support Required:

Access to a staging MySQL environment and a brief code review from a senior developer.

8. SIGNATURES

I hereby confirm that the monthly report was prepared as a true reflection of the status.

Intern:

Tshwarelo NDLOVU Date: 15/12/2025

Direct Mentor (at Host Company): (Review and provide comments/feedback below)

[Supervisor's Name] [Supervisor's Title] Date: [DD Month YYYY]

Supervisor's Comments/Feedback: [***Supervisor to add comments on intern's performance, areas for development, and agreement with the report contents.]***

Employer Project Manager: (Review and provide comments/feedback below)

[Employer Rep's Name] [Employer Rep's Title] Date: [DD Month YYYY]

Employer Rep's Comments/Feedback: [***Employer Rep to add comments on intern's overall progress, alignment with program goals, and any support required.]***

PLEASE NOTE

- Ndiwanga Business Consulting reserves the right to conduct a site visit to verify the interns' report.
- If the information requested above is not attached, or if all the required information is not provided, your report will be regarded as incomplete, and you will be notified.
- A portfolio of evidence should be compiled by the intern and made available for inspection by Ndiwanga Business Consulting/ MICT SETA on the day of the site visit.

- No payment will be made if the report is not submitted
- Reports are due on the 28th of each month
